Personal Statement

I am a passionate learner from Generation's Junior Software Developer Bootcamp pursuing my dream to become a proficient software developer. I have gained strong technical skills including Agile methodology, JavaScript and React in addition to well-rounded soft skills and mindset for tech industry such as growth mindset, communication, teamwork etc. Moreover, my former work experience as administrative officer in audit sector has allowed me to develop advance team-coordinated and detail-organized skills. I am eager to apply my previous work experiences and newly developed technical skills to launch my career in tech sector.

Experience

MARCH 2018 – OCTOBER 2018
Internal Audit Office, Chulalongkorn University
Administrative Officer

- Acquire, collect and examine administrative data and documents to provide for director's office strategy development.
- Organize any assignment conforming to the objective of the office and necessarily accommodate other members to get through obstacles and finishing their missions.
- Inform or advise basic instruction at the workplace, deal with problems responsible in administrative sphere within office and out.
- Attentively review, inform and bring rules and laws regulated to the office and members up to date.

FEB 2017 – JULY 2017
Faculty of Law, Chulalongkorn University
Teacher Assistance

- Review and arrange documents, articles and journals relevant to any assignments (both research part and lesson preparation)
- Participate in processing and providing the final form of the research papers (e.g., preparing proposals draft, typing, citing sources, revising,)
- Contact with the research team to make plans for meeting and to file requested papers and reports.

Training

Feb 2023 - May 2023
Generation Thailand
Junior Software Developer Bootcamp

- Learned how to build web applications from React as front-end, Node.js as back end, and MongoDB as a Database
- Learned essential skills for switching careers, such as growth mindset, communication, agile, and teamwork
- Final Project: MERN Stack CRUD Project : Building Activity Tracking Web Application.

Interest

- **Game developer**

  I am a beginner but also passionate user in Godot game engine.

- **Choralist**

  I was a president of Juris Chorus (Faculty of Law, Thammasat University).
